Progress Update: Segfault Slayer

Schmölz Lukas, **Schöpf Emanuel**, Schweigl Dominik

Game Theme

Game Idea:

- Metroidvania-style 2D side-scroller
- Player fights programming concepts and bugs (mainly C++ related)
- Playful, Pixel-theme (e.g. ASCII-Art for textures)

World design:

- First Area: Hardware with Logic Operators
- Second Area: Programming with loops and other concepts

STUDENT: ALEX | HP: [#####] 5/6 | LEVEL 02
MAP [#####.##]
FOR LOOP
for(i=0;i<N;i++)
FUNCTION
int calculate(x,y)
( )
{ return x+y;
}

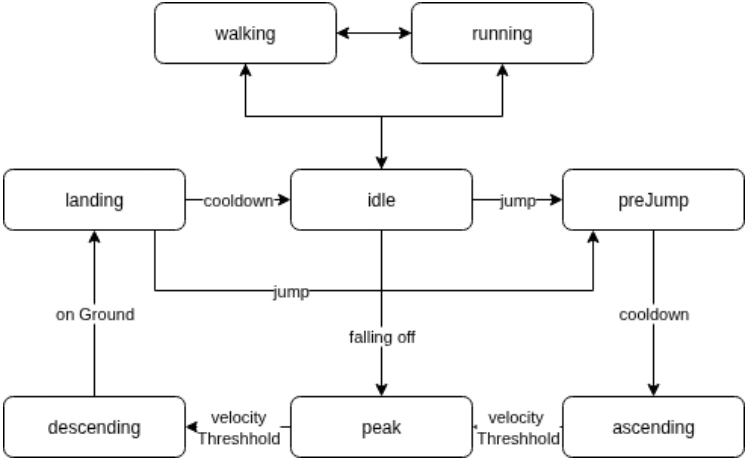
Player

Sprite Assets generated using Pixellab

Sprite Implementation

- State Machine
  (Idle, Walking, Running, 5 Jump)
- Separate Attack Layer with
  Combo System

Player State Machine

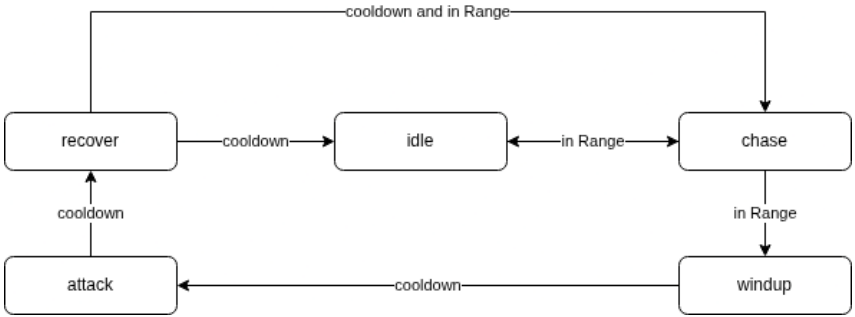


Enemies

First Enemy: Race Condition

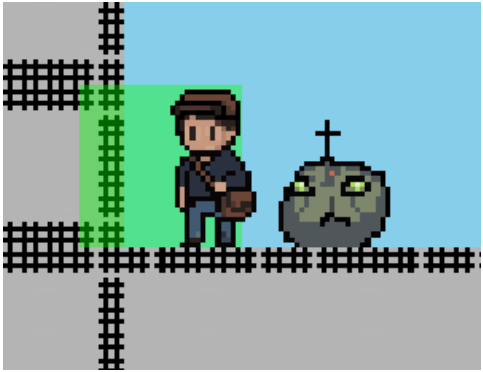
- Is-a-Relation to BaseEnemy
- Composition with EnemyPhysics
- State Machine (Idle, Chase, Windup, Attack, Recover)
- Glitch Ability (Random Teleportation)

Enemy State Machine



Physics

- Separate Collision checks (horizontal and vertical)
- Debug Hitboxes



Map

- Temporary Tile-Textures by Hand
- Tiled for world building
- .tmj and .xml-files

}
```

Tests

Unit Tests

- Player State transitions
- Enemy State transitions
- Enemy Physics

Quick Demo & Code Review

Next Steps

- Proper rendering
- Proper physics
- additional content (player, enemies, Health, rooms, ...)
