

Final presentation: Segfault Slayer

Schmölz Lukas, Schöpf Emanuel, Schweigl Dominik

Game Overview

Game Idea

- Metroidvania-style 2D side-scroller
- Player fights programming concepts and bugs
- Playful, Pixel-theme

World Design

- First Area: Hardware with electric components roaming around
- Second Area: Abstract programming concepts escaped from the bosses lab

Used Tools

Build Tools

- SFML
- Tiled + Tiled
- Catch2

Asset Sources

- Pixel art: Pixellab
- Audio: Pixabay (Sounds), itch.io (Music)

Boss Design

Transistor

- Roams the boss room and shoots projectiles
- Shocks area around him when player too close
- Spawns additional minions in phase 2

Boss Design

Segfault

- Spawns area attacks and environment blockers
- Summons minions in phase 2
- Glitches into 2 versions of himself in phase 3

Demo & Code Review

Final Sprint

- Last Music and Audio wiring
- Item & enemy placement improvement
- Second Area rework
- Story snippets
- Refactoring

Lessons Learned

- Focus on creating a MVP early
- Creative Work just as important as gameplay mechanics
- Better Milestone / Issue Management
